

MXNet 1G 1RU 2-Slot Rack Mount (AC-MXNET-1G-R2)

The AC-MXNET-1G-R2 rack mounting kit offers a space-efficient solution for MXnet device installation. This innovative kit allows two MXnet devices to be mounted horizontally in a single 1U space within standard 19-inch EIA equipment racks. Compatible with MXnet 1G*, MXnet 1G V2 endpoints, and the CBOX-HA controller, the R2 kit maximizes rack density. For installations requiring additional capacity, the R2 can be complemented by the R15 rack kit, providing flexibility for larger deployments.

- Installs in standard 19-inch AV/IT equipment racks
- Supports MXnet 1G and 1G V2 endpoints
- Supports CBOX-HA
- All mounting hardware included

In the Box

- AC-MXNET-1G-R2
- Mounting brackets
- Mounting screws

**Note: The AC-MXNET-1G-DANTE-E is not compatible with the R2 rack.*
