Bluetooth Pairing Instructions

Step 1: Turn on DBT100 by pressing power button which will illuminate in white while the mode button will be blinking green.

Step 2: Activate Bluetooth setting on audio device (cell phone, mp3 player, etc.). Find and select DBT100 on list of available devices.

Step 3: Once Bluetooth audio source is paired with DBT100, the mode button will stop blinking and remain illuminating green, indicating that pairing has successfully connected.

**Any time after initial pairing, when DBT100 is powered on and in range of paired device, it will automatically connect to the recently paired device, if it is not paired with any other device.*
