* Refer to the list located on the right side of this page, to determine which RF loop component you require.

PKDOCK can work with the five (5) existing Radio Frequency (RF) immobilizer bypass components.**

RFLCH

RF immobilizer bypass for most Chrysler vehicles built prior to 2004. You will need two (2) valid ignition keys for programming.

RFLUB

Universal RF loop with inductor that can be used with any preprogrammed transponder pellet. You will need one (1) preprogrammed key.

RFLKIA2

RF immobilizer bypass compatible with the Kia Amanti from 2004 to 2007. The dealer scan tool is required for programming.

RFLMIT3

RF immobilizer bypass for most Mitsubishi models from 2004 & up. The dealer scan tool is required for programming.

RFLCHGM

RF immobilizer bypass for most Chrysler vehicles built after 2004, as well as GM vehicles equipped with the PK3+. You will need two (2) valid ignition keys for programming.

** Refer to each RF loop installation guide for more information on wiring and programming.

Can also work when a transponder is NOT included (using the RFLUB); the key is required however.

Once a transponder has been programmed to a vehicle, it cannot be used in any other vehicle.
