Boost your network speed.

The Intellinet Network Solutions 48-Port Gigabit Ethernet Switch with 10 GbE Uplink (561297) offers an array of features while providing superior network throughput.

Extreme Flexibility

Forty-eight 10/100/1000 Mbps auto-sensing ports automatically detect optimal network speeds.

Future-Proof with 10 Gigabit Ethernet (IEEE 802.3ae)

Equipped with two 10 GbE SFP+ open slots, the Intellinet Network Solutions 48-Port Gigabit Ethernet Switch is the ideal solution for cost-sensitive organizations considering 10 Gigabit Ethernet. With 10 GbE technology going mainstream and becoming ever more popular, the need for additional bandwidth has become more urgent than ever before — even in smaller networks. Whether you wish to connect servers, network attached storage units or NVRs at 10 Gbps, or perhaps you simply want to connect to another Gigabit switch without resorting to LACP techniques, 10 GbE provides the solution. And in case you are not quite ready for 10 GbE just yet, the Intellinet Network Solutions 48-Port Gigabit Ethernet Switch with 10 GbE Uplink accepts standard 1.25G SFP transceiver modules, until the time is right for you to make the switch.

Eliminate Bottlenecks with 48 Gigabit Ports and two 10 GbE SFP+ Ports.

Equipped with 48 auto-sensing 10/100/1000 Mbps RJ45 Gigabit Ethernet ports, this switch offers plenty of performance for your computers, servers and other networking devices. In addition, two 10 GbE small-form-factor pluggable GBIC module slots (SFP+) provide fiber connectivity for greater distances. These are not shared combo-ports, but true 10 Gigabit ports, pushing the total available bandwidth up to 136 Gbps.
