OXYGEN FREE COPPER AMP INSTALL KITS

SALES 386-257-2956

PRODUCT OVERVIEW

We use only true 100% pure oxygen free copper for material. An amplifier's power and performance is greatly influenced by the conductivity of the wire and connections used. Don't be fooled by inexpensive options claiming to boost performance, trust the kits that installers across the nation rely on for clean powerful performance.

Power Wire:

- Pure Oxygen Free Copper conductor for maximum current delivery
- Flexible PVC insulation allows you to bend, twist and contort cable for an easy installation

RCA Cable:

- Twisted Pair technology for maximum noise rejection
- Dual color handle injection easy for channel identification
- Flexible PVC insulation allows you to bend, twist and contort cable for an easy installation

Fuse Holder:

- High-temperature polycarbonate shell provides insulation and protection
- Forged block construction with nickel plating for maximum contact and performance

Speaker Cable:

- Extreme inner-shield guards against noise interference (RFI)
- Pure oxygen-free copper for maximum conductivity
- Flexible PVC insulation allows you to bend, twist and contort cable for an easy installation
- Dual color design easy for positive and negative identification

Kit Includes:

- 17 FT OFC 4GA (8GA for AK80FC) matte red power wire
- 3 FT OFC 4GA (8GA for AK80FC) matte black ground wire
- 20 FT dual color speaker cable, matte red/black
- 17 FT Twisted pair RCA, dual color with a matte red/black jacket
- 1 MANL fuse holder with 1 MANL 80A fuse (60A for AK80FC)
- 2 Nickel plated ring terminals, one black boot, one red boot
- 3 spade terminals with red boots & 2 spade terminals with black boots
- 10 cable ties & 1 grommet
