## TE-ATO IBeam FOOT CONTROL AUTOMATIC TRUNK OPENER

 SALES 800-221-0932

### PRODUCT OVERVIEW

Our iBeam foot control automatic trunk opener works with any vehicle that is equipped with a motorized trunk switch or sliding door mechanism. Once the two sensors are installed, the trunk can be opened by a simple kick action near the vehicle - perfect for when loading groceries, or helping children into the vehicle. This trunk opener is versatile - integrated for positive trigger systems (common on GM vehicles), negative trigger systems (common on Fords and imports), or it is able to be connected directly to the trunk switch. This simple addition to your vehicle will make daily tasks exponentially easier, and you'll soon wonder how you ever lived without it.

- 2 sensor detection design
- Simple kick action to engage trunk opener
- Built-in integration for positive and negative trigger systems, or directly to the trunk switch
- Compatible with vehicles equipped with motorized trunk openers
