Metris F-Cam Kit

The Metris F-Cam adds an aftermarket front camera (or aux video) into the 2016 and Up Mercedes Metris van with a factory-installed rear camera. All connections are Plug'n'Play behind the factory screen. Forcing the front camera or Aux video is available via steering wheel buttons or wire-triggers if desired, but forcing the factory rear camera is not possible.

Note: This kit is only required if the vehicle has an OEM reverse camera and you're adding an additional video source (front cam or aux video). If the vehicle does NOT possess an OEM reverse camera currently, you may use [NTV-KIT715](#) instead.
