1. Unplug the factory wire harness from the back of the power outlet.
2. Plug the factory harness into the female plug on the CH-12PWRH.
3. Plug the male connector on the CH-12PWRH into the power outlet.

4. Connect and crimp power wires.
   RED = Positive (+)
   BLACK = Negative (-)

5. Heat connectors to seal.

CAUTION!
Do not exceed vehicle manufactures power outlet load rating.
If required, in-line fuse should be connected to Positive (+) wire.
