

BACKZONE TRUCK

By Rostra

Introducing **BackZone Truck (250-1903-BZTRK)**, Rostra's latest innovation in vehicle parking assistance systems. Designed around the reliable components that customers have come to expect from the BackZone name, BackZone Truck advances the usability of the product line for light-duty trucks. Key features of this new system include the following:

25-Foot Truck Harness

Ultrasonic parking assistance systems typically require the use of harness extensions when being installed onto light duty trucks. These extensions introduce multiple points of failure and signal interference. That all changes with BackZone Truck. Each BackZone Truck system includes a weather-proof 25' harness designed to connect the four bumper-mounted ultrasonic sensors to the BackZone control module in a single run.

Redesigned BackZone Control Module

The BackZone control module packaged with the BackZone Truck system includes an internal electronics redesign necessary to transmit interference-free signals from the bumper-mounted ultrasonic sensors along the 25-foot harness - an industry first.

Smaller Audible/Visual Display

Compared to Rostra's standard BackZone Plus and FrontZone parking assistance systems, the BackZone Truck includes a dashboard/visor mount display with a smaller overall footprint designed to more seamlessly blend into a vehicle's interior.

Full-Color Retail Packaging

Every BackZone Truck system ships with full-color retail packaging. This box design acts as a "silent salesman" in your showroom detailing the myriad features of the BackZone Truck system. Likewise, the box was redesigned with warehouse distributors in mind providing ample blank panel space for multiple UPC label sizes allowing easy storage and quick retrieval from a warehouse.

BACKZONE ^{By Rostra} TRUCK

What's Included with the BackZone Truck?

- Full-color retail packaging
- Glossy installation/owner's manual.
- Bumper drilling template.
- Four flush-mount ultrasonic sensors.
- Four rubber sensor sleeves.
- Four under-bumper sensor mounts.
- Under-bumper mounting hardware.
- 25-foot sensor extension harness.
- BackZone Truck control module.
- Dashboard/Visor audio-visual display *.
- Standalone buzzer with 19' harness **.
- 21.5 mm hole saw.
- 24.5 mm hole saw.
- Two-wire power/ground harness.
- Cable ties.
- Four 6-degree angled sensor bezels.
- Four 12-degree angled sensor bezels.
- 3M VHB mounting tape for module.
- 3M VHB mounting tape for display.
- Two quick splice connectors.

* Options for Off, Visual Display Only, or Visual Display and Audio Output (90 dB).

** Options for High Audio Output (105 dB) and Low Audio Output (90 dB).
