

Beam Clamp, Spring Steel Decromet (100-Packs)

Overview

3/4 in jaw opening black steel beam clamps with 10-24 and 1/4-20 thread are used to support light loads from structural beams. Beam clamps have an easy and quick installation and fit beam flanges up to 3/4 in. They also made with sharp teeth that bite into beam surfaces to protect against slippage.

Features

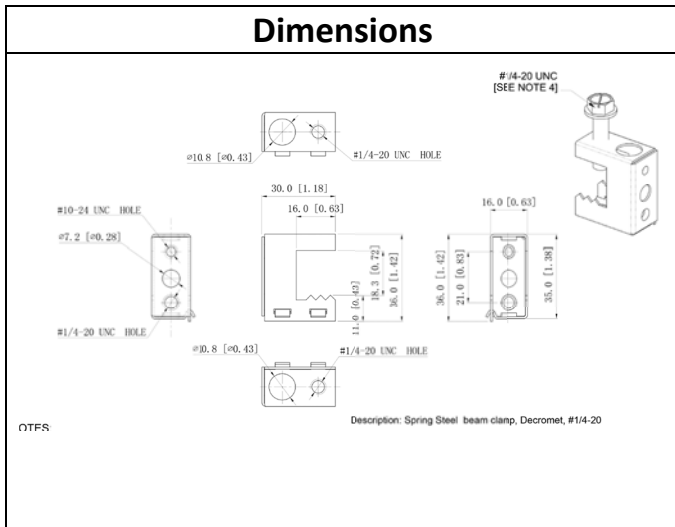

- Use to support light duty loads from structural beams
- Easy and quick installation and fit beam or flat flanges up to 3/4"
- Sharp teeth bite into beam surfaces to protect against slippage
- Indoor/outdoor applications

Compliance

- RoHS
