

# Winegard® 5G Filter

AND MORE

## Get the most from your TV

Experience the best reception by filtering out 5G interference that causes pixelation and loss of channels. Compatible with any TV and amplified or non-amplified TV antenna.

## Simple setup with professional results

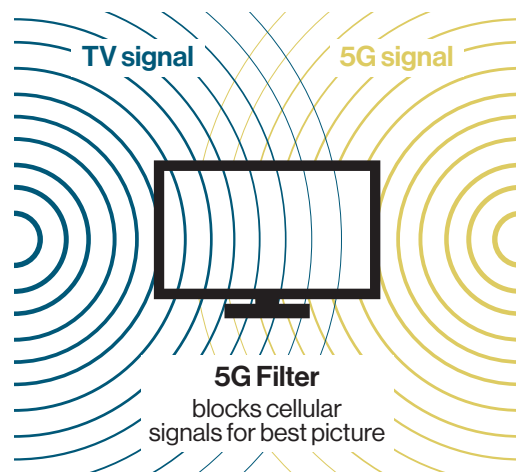

Attached 5" coax creates easy hook up to your TV, especially in tight spaces. No tools or extra connections required.

## 5G and LTE filter technology

Stops interference from signals outside of the TV broadcast band (above 608 Mhz), improving picture quality. Cellular reception for nearby phones and tablets won't be affected.

## Free Winegard Apps

Make sure the antenna is positioned to receive the most programming. The app shows available signals, and you can fine-tune individual channels for maximum reception.
